SWASHES RECORD

Bound Volumes of Congres
It is nauseating to other people to stand before them and while you are talking, give them at whilf or two of your bed breath. It usually comes from food trementing on your stomach. Sometimes you had breath. You can stop that at once by swallowing one or two Stuart Charcoal Lozenges, the most powerful gas and odor absorbers ever prepared.

Sometimes your meals will reveal themselves in your breath to those who talk with you. "You've been eating cabbage," and all of a sudden you belch in the face of your friend. Charcoal is a wondeful absorber of odors, as every one knows. That is why Stuart's Charcoal Lozenges are so quick to stop all gases and odors of odorous foods, or gas from indigestion. Don't use breath perfumes. They never conceal the odor, and never absorb the gas that causes the odor. Besides, the very fact of using them reveals the reason for their use. Stuart's Charcoal Lozenges in the first place stop for good all sour brash and belching of gas, and make your breath pure, fresh, and sweet, just after you've eaten. Then no one will turn his face away from you when you breathe or talk; your breath will be pure and fresh, and besides your food will taste so much besides your food will taste so much besides your own derivit things.
